2010 Columbia River Estuary
Conference

Restoration Practitioners Session

Issues

Themes

1 Funding

- Cash flow management
- Unified application for common funding sources
- Funding Cycles
- Explain funding need to policy makers
- Reporting project success for continued funds

2 Regulatory

- Getting through regulatory issues (permitting)
- Regulatory law enforcement to support restoration

3 Data

- Data management
- Lack of central repository for data management

Themes

4 Outreach

- Translation of regional level priorities to local action
- Assistance between ecological desires to engineering products
- Tools to engage communities
- Public relations-outreach/education to landowners

5 Technical Assistance

- Technical applications-effectiveness, pre-monitoring

6 Monitoring

- Water quality monitoring

7 Adaptive Management

- Take advantage of previous work and fold into other restoration projects
- Adaptive management/Streamlined permitting for restoration projects
