ATTACHMENT 3 OTHER SOURCES OF INFORMATION

TASK 1: LIST OF MATERIALS TO EVALUATE

1.0 INTRODUCTION

This list of material summarizes the data sources to be used for summarizing and characterizing the water quality in the lower Columbia River based on existing data. This deliverable consists of three attachments that include a listing of materials that have been collected and added to the Columbia River bibliographic library database (Attachment 1), a listing of studies that contain data on water, sediment, or biota that will be evaluated as part of Task 1 (Attachment 2), and a list of other sources of information, including contacts at agencies and other organizations (Attachment 3).

2.0 COLUMBIA RIVER BIBLIOGRAPHIC LIBRARY DATABASE

Attachment 1 is a listing all of the references that have been collected and input into the library database as of August 2, 1991. There are currently 161 references contained in the database. These references consist of studies identified in the McConnell (1990) report, studies collected from the Tetra Tech team's in-house libraries, studies collected from two literature searches (i.e., NTIS abstracts and Aquatic Fisheries and Science Abstracts), and studies that have been received in response to phone calls and contacts with various agencies. The library will continue to be updated as additional studies are received. Each entry is coded with a document number (for organizational purposes), a complete citation, and a set of keyword descriptors. Entries in the library apply to all aspects of the Columbia River program and are not limited to Task 1.

3.0 TASK 1 REFERENCE LIST

Attachment 2 is a list of references and data that will be evaluated as part of Task 1. It is a subset of Attachment 1 and consists of 112 entries to date. This list will also be expanded to accommodate additional material that may be received in the future. All the studies that appear to have information or data on water quality, sediment conventional or contaminants, or biological data are included as part of this list. All of these studies will be evaluated to determine which studies are appropriate to use in identifying problem areas and data gaps.

4.0 OTHER SOURCES OF INFORMATION

The third attachment includes a list of all of the people and agencies that have been contacted to gather the appropriate information for inclusion in Task 1. As additional information is gathered from these other sources, it will be included in the library database and in the identification of problem areas, as appropriate.

Varanasi, U., S.L. Chan, B.B. McCain, J.T. Landahl, M.H. Schiwe, R.C. Clark, D.W. Brown, M. Myers, M.M. Krahm, W.D. Gronlund, and W.D. Macleod, Jr. 1988. National benthic surveillance project: Pacific Coast: Part II technical presentation of the results for Cycles I to III (1984-86). NOAA Tech Memo NMFS F/NWC-170. 158 pp + app.

KEYWORDS: Task 1; Task 4; RM 7; Youngs Bay; fish; organochlorines; PCBs; metals; sediments; histopathology; bioaccumulation

DOCUMENT NO.: WDOE003FS LOCATION: BCDP

Washington State Department of Ecology. 1987. NDS Phase II: Bioassumulative pollutant study: Sample tracking system. WDOE, Olympia, WA. 2 pp.

KEYWORDS: Task 1; Task 6; Longview; organics

DOCUMENT NO.: WDOE001FS LOCATION: BCRC

Washington State Department of Fisheries, and Oregon Department of Fish and Wildlife. 1990. Status Report: Columbia River fish runs and fisheries 1960-89. Washington Department of Fisheries and Oregon Department of Fish and Wildlife. 142 pp.

KEYWORDS: Task 1; Task 5; Task 4; fish; fisheries; turbidity; river flow

DOCUMENT NO.: WEYL001F LOCATION: BCDP

Weyerhaeuser Paper Company. 1990. Chemical characterization and bioassay information on Columbia River sediment samples, NPDES Class II inspection, April 1990. Unpublished.

KEYWORDS: Task 1; Task 2; RM 63.5; metals; organics; dioxins; furans; PCBs; pesticides; sediment grain size; organic carbon; point source; NPDES permit; bioassays

DOCUMENT NO.: YOUN003FF LOCATION: BCRC

Young, J.S., J.Q. Word, C.W. Apts, M.E. Barrows, V.I. Cullinan, and N.P. Kohn. 1988. Confirmatory chemical analyses and solid-phase bioassays on sediment from the Columbia River Estuary at Tongue Point, Oregon. PNL-6792/UC-11, Prepared for the U.S. Army Corps of Engineers, Portland District.

KEYWORDS: Task 1; Task 6; Task 4; Tongue Point; dredging; methods; bioassays; bioaccumulation; sediment; benthos; metals; organic carbon; organics; sediment grain size

DOCUMENT NO.: YOUN002D

LOCATION: BCDP

Young, S.R. 1987. Columbia River survey. Unpublished. File II.F.5, Technical Dept., James River Corp., Vancouver, WA.

KEYWORDS: Task 1; Task 2; RM 107-121; river flow; conventionals; metals; point source; Camas; pulp mill

DOCUMENT NO.: YOUN001D

LOCATION: BCDP

Young, S.R. 1988. Columbia River sediment. Unpublished. File II.F.5, Env. Department, James River Corp., Vancouver, WA.

KEYWORDS: Task 1; RM 107-121; sediments; Camas; NPDES permit; point source; pulp mill; metals; organics; PCBs; pesticides
